## SUMMARY

Junior Project & Product Manager with +1 year of hands-on experience supporting project delivery, reporting, and stakeholder coordination in startups, agencies, and public-sector contexts. Final-year International Relations student, bringing a strong analytical and contextual background to data-informed decision-making and execution in complex environments. Currently building solid foundations in Data Analysis (Python, SQL, R) and BI tools (Looker Studio, Power BI, Tableau) to complement qualitative research and project management skills. Comfortable working in English, learning-intensive environments, and cross-functional teams.

## EXPERIENCE

### Freelance Consultant
